

# MAX PERFORMANCE *and energy savings*

## Provides a Perfect Balance...

of energy efficiency, comfort, and cost savings - all year round.

### 1. Maximum performance and energy savings.

Industry leading Low-E insulating performance resulting in year round comfort and energy savings in all climates.

### 2. Save up to 50% on cooling bills and up to 10% on heating bills.

Upgrades the annual insulating performance of single-pane windows to that of double-pane windows and double-pane to triple-pane<sup>(1)</sup>.

### 3. More comfortable environment with less harmful UV rays.

Keeps solar heat out of your home in the hot weather and radiant heat inside your home during cold weather.

### 4. Money back in your pocket without the high cost of window replacement.

Installing EnerLogic film is typically about one-third the cost of replacement windows without all the hassles.

## Product Specs
